EDUCATION

Trine University.

August 2023 – Dec 2025

Master's, of Information Science/studies.

GPA: 3.85

• **Coursework:** Statistics & Quantitative Methods, python programming, Web development, Project Management, Advanced Database Management, Systems Engineering Analysis, Data Science & Big Data, Java programming, Network Management.

Lords Institute of Engineering and Technology

August 2017 - September 2021

Bachelor's, Computer Science

• **Coursework:** Cloud Computing, Relational Database Management, c programming, java programming, Network Management, Business Management.

PROFESSIONAL EXPERIENCE

Infosys, Limited.

INDIA

System's Engineer.

March 2022 – August 2023

- Contributed to creation of Inventory management platform using MERN STACK (JavaScript, ReactJS, NodeJS, ExpressJS, API, Firebase, MongoDB, and Redux Toolkit) for a comprehensive and efficient tech stack.
- Developed 5+ enterprise web applications using React JS, Redux, and ES6, ensuring cross-browser compatibility across Chrome, Firefox, Safari, and IE9+. Implemented responsive designs that increased mobile user engagement and reduced bounce rates significantly.
- Collaborated with UX designers and product managers to translate wireframes into pixel-perfect, interactive interfaces. Conducted code reviews for a team of 6 developers, maintaining code quality standards and reducing production bugs through rigorous testing protocols.
- Built reusable component libraries and established front-end architecture patterns that reduced development time. Created comprehensive documentation for components, enabling faster onboarding of new team members and consistent implementation across projects.
- Optimized application performance by implementing lazy loading, code splitting, and efficient state management techniques. Reduced initial page load times from 8 seconds to under 2 seconds, resulting in improved user satisfaction scores and higher conversion rates.
- Integrated RESTful APIs and managed asynchronous data flows using AJAX, Promises, and Fetch API. Implemented error handling mechanisms and loading states that enhanced user experience during data fetching operations and improved application reliability.
- Worked closely with Spring Boot backend teams to design API contracts and ensure seamless front-end integration. Participated in daily standups, sprint planning, and retrospectives, contributing to a improvement in team velocity over six months.
- Implemented unit testing using Jest and Enzyme, achieving code coverage across all React components. Established automated testing pipelines that caught critical bugs before production deployment, reducing post-release defects and saving QA time.
- Migrated legacy jQuery-based applications to modern React architecture, improving maintainability and reducing technical debt. The migration project enhanced application performance and provided a foundation for future feature development.
- Designed and developed interactive data visualization dashboards using D3.js and Chart.js libraries. These dashboards processed real-time data streams and provided business stakeholders with actionable insights, supporting data-driven decision-making processes.
- Configured Webpack and Babel for optimized build processes, reducing bundle sizes through tree shaking and minification. Implemented caching strategies and CDN integration that decreased server load and improved global content delivery speeds substantially.

- Developed custom hooks and higher-order components to encapsulate complex business logic and promote code reusability. This approach reduced code duplication and made the codebase more maintainable for future enhancements and feature additions.
- Participated in client meetings to gather requirements, provide technical feasibility assessments, and demo completed features. Successfully managed stakeholder expectations and delivered 12 major projects on time, earning client appreciation and repeat business opportunities.

Infosys, Limited.

INDIA

Systems Engineer Trainee.

Oct 2021 - Feb2022

- Learned using React JS components, Forms, Events, Keys, Router, plus Redux, Animations and Flux concept.
- Used React.js for creating interactive UI's using One-way data flow, Virtual DOM, JSX, React Native concepts. Familiar with creating Custom Reusable React Components Library.
- Utilized Angular JS Directives, Controllers, Filters, Services, Templates, Events, and Injectors.
- Collaborated with marketing teams to develop and implement business strategies, design and produce promotional materials, and execute marketing campaigns to promote the company, Increased website traffic by 20%
- As an Intern, utilised tools like Jira and Trello to enhance team collaboration and efficiency by 30% using Agile methodologies, resulting in a 20% reduction in project delivery time. Proficient in Adobe Analytics and SharePoint, with a foundational understanding of Python and SQL for data analysis. Strong interest in training development, with exceptional communication and interpersonal skills, focused on delivering positive customer experiences and fostering a culture of continuous learning.

PROJECTS & OUTSIDE EXPERIENCE

MERN Stack Portfolio

Hyderabad, Telangana, India

- Developed a personalized portfolio: [Siddiq's Portfolio](#) , webpage using ReactJS and CSS, displaying my programming ability and creativity, seamlessly integrated Tailwind CSS to ensure an aesthetically pleasing and intuitive user experience.

SKILLS & CERTIFICATIONS.

Skills: HTML, CSS, JavaScript, React, Python programming, Agile Project Management, Jira, Trello, Adobe Analytics, SQL, Version Control (Git), Responsive Design, User Experience (UX) Optimisation, Team Collaboration, Technical Documentation.

Certifications: Project Management Professional (PMI-PMP), Advance database, CompTIA Network + course, IBM Network, and security management.
